ICS2: New European customs regulation for import & transit

With the arrival of ICS2 as the new customs regulation for shipments arriving in the EU, some of the FHL (House Air Waybill electronic message) data will become mandatory to be able to transport shipment to or through the EU.

This document aims to provide some technical support about the newly mandatory data and their format (CIMP) to enrich the FHL message (non-exhaustive list).

As a forwarder transporting shipments to or through the EU, you must submit them according to the up-to-date applicable regulations.
